Classical liberalism is a political ideology and a branch of liberalism which advocates civil liberties under the rule of law with an emphasis on economic freedom. Closely related to economic liberalism, it developed in the early 19th century, building on ideas from the previous century as a response to urbanization and to the Industrial Revolution in Europe and the United States.

Embedded liberalism is a term for the global economic system and the associated international political orientation as they existed from the end of World War II to the 1970s. The system was set up to support a combination of free trade with the freedom for states to enhance their provision of welfare and to regulate their economies to reduce unemployment.

John Locke (b. 1632, d. 1704) was a British philosopher, Oxford academic and medical researcher. Locke's monumental *An Essay Concerning Human Understanding* (1689) is one of the first great defenses of modern empiricism and concerns itself with determining the limits of human understanding in respect to a wide spectrum of topics. It thus tells us in some detail what one can legitimately claim ...

This book worked great with my class. Very similar to the previous edition so if you need to save money, you could get the older one. It's always recommended that if you've been assigned problems to check out the edition on reserve in your college library just to make sure the numbering hasn't changed.
