

neural network toolbox pdf

Deep Learning Toolbox provides a framework for designing and implementing deep neural networks with algorithms, pretrained models, and apps.

Deep Learning Toolbox Documentation - MathWorks

A neural circuit, is a population of neurons interconnected by synapses to carry out a specific function when activated. Neural circuits interconnect to one another to form large scale brain networks. Biological neural networks have inspired the design of artificial neural networks

Neural circuit - Wikipedia

These images are synthetically generated to maximally activate individual neurons in a Deep Neural Network (DNN). They show what each neuron "wants to see", and thus what each neuron has learned to look for.

Jason Yosinski

The Golgi complex is composed of a stack of membrane-bound cisternae located in the cytoplasm adjacent to the nucleus. The Golgi processes newly synthesized proteins (post-translational modification), sorts and routes them to their final destination.

Here, NLPCA is applied to 19-dimensional spectral data representing equivalent widths of 19 absorption lines of 487 stars, available at www.cida.ve. The figure in the middle shows a visualisation of the data by using the first three components of standard PCA.

NLPCA - nonlinear PCA - auto-associative neural networks

IEEE Transactions on Neural Networks is devoted to the science and technology of neural networks, which disclose significant technical knowledge, exploratory developments, and applications of neural networks from biology to software to hardware.. This Transactions ceased production in 2011. The current retitled publication is IEEE Transactions on Neural Networks and Learning Systems.

IEEE Xplore: IEEE Transactions on Neural Networks

IEEE Transactions on Neural Networks and Learning Systems publishes technical articles that deal with the theory, design, and applications of neural networks and related learning systems.

3DMatch Toolbox. 3DMatch is a ConvNet-based local geometric feature descriptor that operates on 3D data (i.e. point clouds, depth maps, meshes, etc.).

3DMatch Toolbox - GitHub

We compare a variety of models for predicting early hospital readmissions. Performance of existing models is insufficient for practical applications.

A comparison of models for predicting early hospital

Social network analysis (SNA) is the process of investigating social structures through the use of networks and graph theory. It characterizes networked structures in terms of nodes (individual actors, people, or things within the network) and the ties, edges, or links (relationships or interactions) that connect them. Examples of social structures commonly visualized through social network ...

Dimension The VC dimension is a scalar value that measures the capacity of a set of functions.

Support Vector Machines for Classification and Regression

ALI - Automated Lesion Identification SPM12 SPM8 SPM5 . Summary: ALI is a research tool for lesion delineation and spatial normalization for patients with brain damage. It uses the unified normalisation-segmentation algorithm with an explicit extra prior for the lesion that is refined iteratively in a patient-specific manner.

SPM Extensions - Wellcome Trust Centre for Neuroimaging

Intel® Integrated Performance Primitives (Intel® IPP) is a software library that provides a broad range of functionality, including general signal and image processing, computer vision, data compression, and string manipulation.
