Eï¬€ects of Noise on Nonlinear Dynamics. Andr e Longtin 6.1 Introduction. The influence of noise on nonlinear dynamical systems is a very important area of research, since all systems, physiological and other, evolve in the presence of noisy driving forces. It is often thought that noise has only a blurring effect on the evolution of dynamical systems.

### **Eï¬€ects of Noise on Nonlinear Dynamics**

the hallmark of nonlinear behaviour. Noise 1 can make the determination of bifurcation points very difficult, even for the simplest bifurcations. 2 can shift bifurcation points. 3 can induce behaviors that have no deterministic counterpart, through what are known as noise-induced transitions.

The three volumes that make up Noise in Nonlinear Dynamical Systems comprise a collection of specially written authoritative reviews on all aspects of the subject, representative of all the major practitioners in the field. The second volume applies the theory of Volume 1 to the calculation of the influence of noise in a variety of contexts.
