The name "shortwave" originated during the early days of radio in the early 20th century, when the radio spectrum was considered divided into long wave (LW), medium wave (MW) and short wave bands based on the wavelength of the radio waves. Shortwave radio received its name because the wavelengths in this band are relatively shorter than 200 m (1,500 kHz) which marked the original upper limit of ...

The Waves is a 1931 novel by Virginia Woolf. It is considered her most experimental work, and consists of soliloquies spoken by the book's six characters: Bernard, Susan, Rhoda, Neville, Jinny, and Louis. Also important is Percival, the seventh character, though readers never hear him speak in his own voice.

The sinoatrial node (SA) is the primary pacemaker of the heart. The SA node is located in the upper right atrium and beats at a rate of 60-100 beats per minute. The impulses are then directed through the internodal pathways. These cells
