I'll create an WCF for uploading file such as images or pdf files to te server. How can I create a service that can handle this function ? I tried to googling about it, but most of article told me to use Stream as service parameter.

c# - upload file wcf - Stack Overflow

I am developing the SSRS report and wanted to consume the one method call of the WCF service. Suppose I have a service Url like `http://localhost2014security.svc` and wanted to consume string `Encrypt(string data)` method from that service. Now I know how to use XML and Web service as the data source.

reporting services - How to call WCF method from the SSRS

Get Started scripting language. A scripting language is a form of programming language that is usually interpreted rather than compiled. Scripting languages are typically converted into machine code on the fly during runtime by a program called an interpreter.

Web Services Enhancements (WSE) is an obsolete [citation needed] add-on to the Microsoft.NET Framework, which includes a set of classes that implement additional WS-* web service specifications chiefly in areas such as security, reliable messaging, and sending attachments. Web services are business logic components which provide functionality via the Internet using standard protocols such as HTTP.

Web Services Enhancements - Wikipedia

Note: 2008 and older issues are only available as .chm files. On most versions of windows you must first save these files to your local machine, and then unblock the file in order to read it. To unblock a file, right click on it, and select properties, and then select the "unblock" button.

MSDN Magazine Issues

We intended to use this certificate as root level certificate authority so it can be used to issue chain trusted certificates for encrypting communications between server and client, as well as authenticating web clients that are going to access the WCF service hosted on the server.

Use makecert.exe to generate certificates for WCF service

A service-oriented architecture (SOA) is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. The basic principles of service-oriented architecture are independent of vendors, products and technologies. A service is a discrete unit of functionality that can be accessed remotely and acted upon ...
